

Workshop on The Social Dimensions of Globalisation

Workshop 21-22 February 2000 – The importance and topical relevance of this workshop clearly emerge from its title. Perhaps this is the first time that a number of eminent scholars and authorities have sought to address themselves to the subject of globalisation by concentrating on the social dimensions of this increasingly discussed phenomenon. This work will be of interest to all those who are concerned with the many human ramifications of a process which is seen by some commentators as being highly positive but by others as a development which is full of dangers.
